

THE POWER OF STEAM

Water vapour is a truly talented all-rounder: when it comes to mining oil, generating power in steam turbines, inhaling medicines or ironing textiles, water vapour has properties that benefit us. WAGNER makes the most of the power of water vapour too.

While conventional wallpaper steamer often involve a high chemical content (e.g. tensides), with a WAGNER steam wallpaper remover, you can always be sure you're safe. Simply place the steamer plate over the place you wish to strip and apply the steam until the wallpaper is soft. The steam effectively dissolves the wallpaper adhesive.

TIPS & TRICKS

- TIPP #1:** Before starting work, cover the floor and get a container ready for the wallpaper waste.
- TIPP #2:** When dealing with multiple layers, painted-over or waterproof wallpapers, we recommend scoring or perforating the wallpaper first (e.g. with a hedgehog roller)
- TIPP #3:** Mask off sockets and switches.
- TIPP #4:** Remove objects from the walls.
- TIPP #5:** Add warm water to the tank to shorten the device's heating time
- TIPP #6:** Place the device on an even surface when working since tilting it could damage the heating element.
- TIPP #7:** Hold the steamer plate on the wallpaper for up to 10 seconds, then move it to the next area.
- TIPP #8:** Do not hold the steamer plate in one place for too long - it is important to protect the surface underneath.

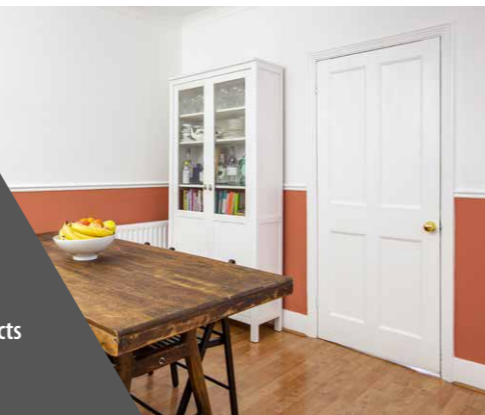

BENEFIT OF STEAM

Remove wallpaper easily whilst protecting the environment – that is exactly what the Steamforce steam wallpaper remover from WAGNER is designed to do. Use the power of steam to remove wallpaper easily without chemical additives. A long steaming time enables you to cover large areas without interruption. The lightweight and handy steamer plate makes for fatigue-free working. The high working speed is especially evident when removing stubborn wallpapers.
